

PRESS RELEASE

## Sorbonne University Signs the CoARA Agreement

---

Paris, the 9<sup>th</sup> November, 2022

**Sorbonne University is a signatory of the Agreement on Reforming Research Assessment. This international agreement realigns research objectives with assessment practices for researchers and research organizations, with the overarching goal to maximize the quality and impact of research. The agreement includes the principles, commitments and timeframe for reforms and lays out the principles for a Coalition of organizations willing to work together in implementing the changes, while respecting each organization's autonomy.**

In February 2021, Sorbonne University formalized its [policy of promoting actions for open science in the internal evaluation of research at Sorbonne University](#), in which it affirmed that priority be given to the evaluation of research:

- The content and intrinsic quality of research work
- Open access publication
- The opening of research data
- The dissemination of knowledge
- Other actions in favor of the opening of science

In September 2022, Sorbonne University also signed the San Francisco Declaration on Research Assessment (the [DORA](#)<sup>1</sup> Agreement) and continued its commitment to the evolution of assessment practices.

The [Agreement on Reforming Research Assessment](#) was developed by a team of representatives from the European University Association (EUA), Science Europe and the European Commission and was negotiated by more than 350 organizations from more than 40 countries. Input was given from a diverse group from the European research community, including LERU and Sorbonne University, who were part of the Stakeholder Assembly. Following a consultation with EU member states and associated countries, the final version of the agreement was established in July 2022.

Sorbonne University is pleased that the CNRS, the ANR and HCERES are among the early signatories in France. These signatories will work together to enable systemic reform on the basis of common principles within an agreed timeframe and to facilitate exchanges of information and mutual learning between all those willing to improve research assessment practices. They are committed to working together and to respecting a common vision based on the recognition of the diversity of the productions of research practices and activities, giving priority to the quality and impact of research.

There are ten core commitments to this agreement:

1. Recognize the diversity of contributions to, and careers in, research in accordance with the needs and nature of the research
2. Base research assessment primarily on qualitative evaluation for which peer review is central, supported by responsible use of quantitative indicators
3. Abandon inappropriate uses in research assessment of journal- and publication-based metrics, in particular inappropriate uses of Journal Impact Factor (JIF) and h-index
4. Avoid the use of rankings of research organizations in research assessment

---

<sup>1</sup> DORA Agreement: The San Francisco Declaration on Research Assessment

5. Commit resources to reforming research assessment as is needed to achieve the organizational changes committed to
6. Review and develop research assessment criteria, tools and processes
7. Raise awareness of research assessment reform and provide transparent communication, guidance, and training on assessment criteria and processes as well as their use
8. Exchange practices and experiences to enable mutual learning within and beyond the Coalition
9. Communicate progress made on adherence to the principles and implementation of the commitments
10. Evaluate practices, criteria and tools based on solid evidence and the state-of-the-art in research on research, and make data openly available for evidence gathering and research

Sorbonne University will share the process of reviewing or developing criteria, tools and processes in line with the core Commitments to recognize Sorbonne University researchers and research units in their dedication to excellence in research.

**About Sorbonne University:**

*Sorbonne University is a world-class, multidisciplinary, research-intensive university. Its three faculties cover the fields of arts, humanities, medicine, science and engineering. Established in the heart of Paris and present in other regions of France, Sorbonne University is committed to the success of its student community. It is committed to responding to major societal challenges and to transmitting the knowledge generated by its laboratories and research teams. The 52,000 students, 6,400 teaching and research staff and 3,900 administrative and technical staff, Sorbonne University is diverse, creative, innovative and open to the world. With the Muséum national d'Histoire naturelle, the Université de Technologie de Compiègne, INSEAD, the Pôle Supérieur Paris Boulogne-Billancourt and France Education International, it forms the Alliance Sorbonne Université, which favors a global approach to teaching and research, promotes access to knowledge, and develops academic programs and projects. Sorbonne University is also a member of the 4EU+ Alliance, an innovative model of European university. <https://www.sorbonne-universite.fr>  @ServicePresseSU*
